SUMMARY

Senior frontend engineer with 8 years building data-heavy web apps in fintech, analytics and blockchain intelligence, most recently on TRM Forensics at TRM Labs. I specialize in React and TypeScript performance, accessible design systems and AI product UI, and own features end to end.

EXPERIENCE

TRM Labs, Remote (Bengaluru) | Frontend Engineer

NOV 2023 – 2026

- **Graph performance:** Removed quadratic hot paths in the investigation graph across two renderers (ReGraph, then KeyLines); led a 20+ PR push in which memoized index lookups took plot matching on 1,600 elements *from 15.5 s to 14 ms*. Fixed address plotting in a browser-isolated customer environment.
- **Load performance:** Introduced route-level code splitting (*~85% smaller initial bundle*), moved the entity page's slowest request (*p95 25 s*) off initial load, and cut polling from 30 req/s peaks to ~3 req/min.
- **AI product UI:** Built the chat UI for Co-Case Agent (now Orion), an AI investigation assistant *launched March 2026*: virtualized streaming transcript, collapsible chain-of-thought, graph-linked answers, pop-out window.
- **Design system and accessibility:** Proposed and built a Radix UI and Tailwind CSS design system to replace Ant Design (*all new UI is built on it*). For a government contract, built keyboard-navigable tables (arrow keys, WASD, aria-live) and fixed focus and tab order.
- **Internationalization:** Led frontend i18n with lazy-loaded, cached translations, generated TypeScript types for every key, and pre-commit and CI checks plus agent rules for untranslated text.
- **End-to-end features:** Shipped Triage escalation, Deconflict notifications and the T3 Financial Crime Unit request flow across *React, Node.js/FeathersJS, email, audit log and E2E tests*. Rebuilt Settings to the Figma spec with license and SKU enforcement.
- **Type safety, AI tooling:** Built an OpenAPI-typed client so breaking API changes fail in the backend PR; added AI performance review to CI; wrote Cursor and Claude Code agents for the team. *580+ merged PRs*.

Paytm, Bengaluru | Senior Software Engineer

MAR 2022 – OCT 2023

- **Paytm Payments:** Led a project that cut a backend service's running cost by *about 90 percent*. Built a configurable A/B testing framework and improved frontend load time by about 30 percent.
- **Paytm Money:** Built a stock-market education video platform and a standalone ETF page in React, styled-components and React Query.

Enterprise Minds, Pune (remote) | Senior Software Engineer, Consulting

OCT 2020 – MAR 2022

- **ThoughtSpot:** Migrated the core charting and table area from a *legacy Angular app to React micro-frontends* with GraphQL and Apollo Client, plus unit, integration and E2E tests. Recognized at CodeX 2021.
- **Open Financial, Logik:** Refactored Open Financial's frontend onto Next.js and React Query; built a React and D3 tree proof of concept for Logik.

Infosys, Hyderabad | Senior Systems Engineer

APR 2018 – OCT 2020

- **Arizona Public Service:** Built an iOS app in Xamarin with Microsoft App Center analytics and crash reporting. *Won AssistEdge 2018*, Infosys's bot-automation hackathon.

EDUCATION

ITER, SOA University, Bhubaneswar | B.Tech, Computer Science

2014 – 2018 | CGPA 8.56 | Google Developer Group Devlympics 2017 finalist

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux, Zustand, React Query, Vite

UI and design systems: Tailwind CSS, Radix UI, Ant Design, styled-components, Storybook, Figma handoff, micro-frontends

Performance, accessibility: Code splitting, virtualization, Intersection Observer, DevTools profiling, WCAG, ARIA, i18n

Data, APIs, testing: KeyLines, ReGraph, D3, GraphQL, Apollo Client, REST, OpenAPI, Jest, React Testing Library, Playwright

Backend, infra, AI: Node.js, FeathersJS, PostgreSQL, Auth0, LaunchDarkly, GitHub Actions, Cursor, Claude Code, MCP
